ABOUT COMPOSE

Rural Communities engaged with positive energy

COMPOSE is a three-year project whose main objective is to increase the share of renewable local energy sources in energy mix strategies and plans in 11 Mediterranean regions.

The project builds on existing experience and know-how from previous projects and initiatives to provide a RES development planning synthesis model and therefore the increase thereof in energy mix of selected areas by promoting the development of local business in combination with the development of local added value chains. As a horizontal principle, the project consists of the knowledge, sectorial policies and financial instruments required to promote and invite green investments, based on local potentials.

Altogether, COMPOSE will implement minimum 15 pilot activities aiming to promote, strengthen and increase the use of RES hand in hand with EE measures.

COMPOSE OBJECTIVES

COMPOSE shall contribute to an increased sustainable RES planning capacity at the decision-making and planning-expert levels, whose main objective is to promote new business models and technology development to compose green economy by connecting local potentials to sustainable energy supply chains.

COMPOSE CORE ACTIVITIES

- 01** Integration of RES and EE measures in development planning in MED regions.
- 02** Holistic testing of RES development planning.
- 03** Transferring the use value of the COMPOSE model to the Mediterranean Region as a whole and promote the COMPOSE planning model on the EU policy level.

COMPOSE RESULTS

- 01** Implementation of 15 pilot cases in compliance with the COMPOSE development planning model.
- 02** Development of training materials for decision-makers and development planning experts.
- 03** Organisation of public promotional and awareness-raising events with tailor-made training and capacity-building events for decision-makers and development planning experts.
- 04** Drawing up of a policy paper in support of the COMPOSE development planning model prepared and promoted on the EU policy level.
- 05** Having a Memorandum of Understanding signed by representatives of local and regional authorities in the Mediterranean Region that recognises the use value of the COMPOSE development planning model and its integration in their development planning processes.
